

ABSTRACT

This was an attempt to implement the AICTE programme ideas in the villages to improve quality education, create awareness among people about their mental and physical hygiene, to enhance art, culture and natural heritage. Our team visited two villages called Jarikatte and Naganur, near the outskirts of Davanagere. Some healthy programmes were accomplished by dividing the team into smaller groups cleaning the surroundings (Swachh Bharat Mission). We also visited the water treatment plant . All our efforts got successful results. We hope the people caught the awareness about the factors and phenomenon.

AICTE Activity points program

INTRODUCTION

Apart from technical knowledge and skills, to be successful as professionals, students should have **excellent soft skills, leadership qualities and team spirit**. They should have entrepreneurial capabilities and societal commitment. In order to match these multifarious requirements, AICTE has created a unique mechanism of awarding **minimum 100 Activity Points** over and above the academic grades.

Every regular student, who is admitted to the 4 years degree Programme, is required to earn 100 Activity Points in addition to the required academic grades, for getting 4 Years degree Programme. Students entering 4 years Degree Programme through lateral entry are required to earn 75 Activity Points, in addition to the academic grades, for getting 4 years' degree program. Similarly, Diploma students are required to earn 75 Activity Points during 3 years of their diploma Programme.

Every student is required to prepare a file containing documentary proofs of activities, done by him/ her. This file will be duly verified by the concerned evaluator. The student should earn at least 100 activity points before he/ she appears for his/ her Final Examinations. The points students have earned will be reflected on the student's transcript.

As proposed under the AICTE Rural Internship Programme, if a student completes any long-term goal during his degree Programme, it will be counted as Internship Activity and credit requirement for the internship is fulfilled. However, if only short-term interventions under the Programme are attempted it will be counted towards AICTE Activity Point Programme requisite.

ACTIVITY-1

CONDUCTED CLEANLINESS DRIVE IN COLLEGE

INTRODUCTION:

As part of the AICTE's Swachh Bharat Abhiyan initiative, VTU college organized a Cleanliness Drive to promote awareness about hygiene and environmental sustainability. The event aimed to encourage students and faculty to actively participate in maintaining a clean and green campus. During the drive, volunteers cleaned classrooms, corridors, and the college surroundings. They also planted saplings and placed dustbins at key locations to promote waste management. The initiative highlighted the importance of reducing plastic usage and adopting eco-friendly practices.

The cleanliness drive also included awareness sessions and poster campaigns, emphasizing the significance of cleanliness in daily life. Students displayed creative posters with messages on hygiene, waste segregation, and environmental protection. The event successfully fostered a sense of responsibility and community service among participants. AICTE applauded the efforts of the college for contributing to the Swachh Bharat mission, encouraging other institutions to undertake similar initiatives regularly.

PURPOSE OF THE ACTIVITY :

The purpose of the Cleanliness Drive conducted under the AICTE initiative was to raise awareness about hygiene and environmental sustainability among students and faculty. The activity aimed to promote the importance of clean and healthy surroundings, encouraging participants to take responsibility for maintaining their campus. By involving students in cleaning activities, waste segregation, and plantation drives, the event aimed to instill values of cleanliness, discipline, and civic responsibility. It also sought to educate students on reducing plastic usage and adopting eco-friendly practices in their daily lives.

Additionally, the drive aimed to support the Swachh Bharat Abhiyan by encouraging educational institutions to take an active role in creating a cleaner and greener environment. Through activities like poster campaigns and awareness sessions, the event emphasized the long-term benefits of cleanliness on health and well-being. It also aimed to inspire students to become responsible citizens by practicing and promoting cleanliness beyond the campus, contributing to a healthier and more sustainable society.

MY ROLE:

During the Cleanliness Drive conducted under the AICTE initiative, I actively participated by cleaning the college premises, including classrooms, corridors, and the surrounding areas. I helped in removing litter, dust, and waste, ensuring the environment was neat and tidy. I also took part in waste segregation, making sure recyclable and non-recyclable materials were disposed of properly. Additionally, I contributed to the plantation activity, where I helped in planting saplings, promoting a greener and more eco-friendly campus.

Apart from the cleaning tasks, I also participated in the awareness campaign by making and displaying posters with messages on cleanliness and hygiene. I encouraged my peers to reduce plastic usage and adopt sustainable practices. Through this activity, I gained a sense of responsibility and teamwork, and it inspired me to continue promoting cleanliness and environmental awareness in my daily life.

CONCLUSION:

The Cleanliness Drive conducted under the AICTE initiative was a meaningful and impactful experience that promoted hygiene, sustainability, and social responsibility. It not only helped in maintaining a clean and eco-friendly campus but also created awareness about the importance of waste management and green practices. Through my participation, I developed a strong sense of responsibility and teamwork, and it motivated me to continue practicing and promoting cleanliness in my daily life. This initiative also reinforced the importance of contributing to a cleaner and healthier environment for a better future.

ACTIVITY- 2

PLANTATION

INTRODUCTION:

Plantation Program, which was made compulsory by All India Council for Technical Studies (AICTE) for environmental and protection education and to promote development in the country in a coordinated and integrated manner by the upcoming generation. We had covered more than 50 farms each day in groups by taking survey and spreading awareness for the first day and the other day we shared our time with school students giving them information about importance of protecting environment a Around 51 students actively participated in this program. Trees play an essential part of every community and one must make huge efforts to maintain it that way. The tree plantation drive was conducted with an aim to control global warming, make environment pollution free and spread awareness on the importance of keeping a clean environment, it stated. As part of the initiative, saplings were planted by the students of BIET.

Aim and Objective of Tree Plantation: -

- To create green belt and avenues for meeting aesthetic recreational needs to the people.
- To beautify the areas for scenic beauty
- To reduce the surface run-off discharge and checking soil erosion along the embankments.
- To reduce temperature and increase humidity
- To reduce noise pollution to the neighboring household population.
- To reduce the impacts of air pollution and dust as trees and shrubs are known to be natural sink for air pollutants.
- To provide much needed shade on glaring hot roads during summer.
- Moderating the effect of wind and incoming radiation.
- To define the ROW especially highlight sharp horizontal curves during night
- To promote road development as eco-friendly activity.

ACTIVITY-3 GOVERNMENT SCHOOL VISIT

INTRODUCTION:

As part of the AICTE initiative, we visited Government School in Kurki to conduct various activities aimed at promoting learning, awareness, and community engagement. The purpose of this visit was to interact with the students, organize educational and fun activities, and contribute to their overall growth and development. Through this initiative, we aimed to share knowledge, build confidence, and encourage the students to pursue education with enthusiasm. The visit also provided us with an opportunity to give back to the community and make a positive impact on the young minds..

As part of the AICTE initiative, we visited a government school in Kurki and conducted various engaging activities for the students. The purpose of the visit was to interact with the children, promote learning, and encourage creativity. We organized fun and educational activities such as games, quizzes, and storytelling sessions, which helped the students learn in an enjoyable way. Additionally, we conducted a plantation drive, where both students and volunteers participated in planting saplings, promoting environmental awareness.

Through this initiative, we aimed to motivate the students and create a positive learning environment. We also encouraged them to develop good habits, teamwork, and creativity through interactive sessions. The visit provided us with an opportunity to give back to the community and make a meaningful impact on the young minds. It was a rewarding experience that fostered a sense of responsibility and compassion, inspiring us to contribute more to such social initiatives in the future.

ACTIVITY-4

WASTE MANAGEMENT SYSTEM IN RURAL AREAS

INTRODUCTION

Wastes arise in association with almost every human activity and reflect the diversity of man's actions. Some waste may have some value to someone either in its present stage or in a converted stage. The rural organic waste includes agricultural, domestic and rural industrial wastes. Agricultural waste is preliminary originated from animals (excreta and by products of dead animals) and plants (leaves, stalks, stubbles and shells) (Varshney, 1987). The nature, proportion and methods of utilization of organic wastes differ widely from place to place. Every farm requires a waste management system, and almost every farm unique in its combination of waste production, handling, storage, treatment and disposal either by recycling or by discharge.

There remains unutilized a huge amount of recyclable industrial and organic wastes (cow dung). It is seriously needed to use them in environment friendly way even to protect the civilians from highly degraded and polluted environment. The usual useful source the cow dung production in the country is about 225 million tons (AIS, 2003) and that from other animals and poultry is about 9.3 million tons per year according to the census of agriculture 1996 (BBS,2003) considering an average production of fresh dung as 9.5 kg per cattle, 200 goat or sheep, 60 g per local and 233 g per exotic poultry and 80 g per duck. The total recyclable produce thus stands about 279.88 MT or dry matter product of 139.94 million tons. Considering a dry matter (DM) need of 7.5 ton per hectare for an average yield of agricultural crops, this amount of SW can be used for 9329333 hectares of land for double crop (15 t/ha compost) per year which accounts more than total operated land (8293343.73 hectares) of the country. But unfortunately, the major parts of these wastes are wasted and lost due to non- recycling and proper preservation. Washing down to ditches, rivers and burning as fuels, garaging or land filling etc.

The wastes play a harmful role to the environment. It pollutes the air, water and soil. When the wastes are thrown in any place, they are rotten and produces bad odor. Many micro-organisms work on waste and cause many harmful diseases. Rotten wastes produce and create global warming. Waste decomposition frequently pollutes the open water sources (river, pond, lake, etc.) as it reaches there by surface run off with rain water. Sometimes it pollutes the ground water through leaching or percolation with rainwater. It causes O₂ deficiency in water and becomes harmful for the fish, bacteria, fungal and other living organism. At present these wastes are somehow being managed to dispose and dump, which is causing environmental pollution day by day and becoming health hazard. Till to date little attention has been given on this vital issue in Bangladesh to overcome this problem. If it could pay good attention to handle this problem properly waste would be less generous to open water source, ground water and the environment without causing huge monetary involvement.

OUTCOMES:

The implementation of waste management systems in rural areas, such as Kumbalurur, Karnataka, India, has led to several positive outcomes. These systems have significantly contributed to environmental protection by reducing pollution and promoting the sustainable use of resources. Public health has improved due to better sanitation and reduced disease transmission. Economically, waste management has created job opportunities and generated income through recycling and reuse of materials. Socially, cleaner villages have enhanced the quality of life and attracted tourism. Overall, these initiatives have fostered community engagement and awareness, leading to a cleaner, healthier, and more sustainable environment.

ACTIVITY-5

CONDUCTED AWARENESS PROGRAM ABOUT DIGITAL INDIA TO OUR JUNIORS

INTRODUCTION:

As part of our awareness initiative, we conducted a Digital India program for our juniors to educate them about the importance and impact of digital transformation in the country. The session aimed to spread awareness about the Digital India campaign, launched by the Government of India, which focuses on promoting technology, e-governance, and digital literacy. During the program, we highlighted the benefits of digital services, such as online transactions, e-learning platforms, and government e-services, emphasizing how they make daily tasks more efficient and accessible.

The program also aimed to familiarize juniors with the significance of cybersecurity and responsible online behavior. We discussed topics like digital payments, online safety, and the importance of data privacy. Through interactive discussions and real-life examples, we encouraged them to adopt digital tools responsibly and stay updated with the latest technological advancements. The session was a valuable learning experience, helping juniors understand the role of digital empowerment in shaping a technologically advanced society.

OBJECTIVES OF DIGITAL INDIA

We conducted an awareness program on Digital India for our juniors to educate them about the importance of digital literacy and e-governance. The session aimed to highlight how digital services and technology are transforming various sectors, making daily activities more convenient and efficient.

Objectives:

1. To spread awareness about the Digital India campaign and its impact on society.
2. To educate juniors about the benefits of digital services and e-governance.
3. To promote cybersecurity awareness and responsible use of digital platforms.
4. To encourage the adoption of digital tools for education, communication, and financial transactions.

Advantages of Digital India:

- **Improved Accessibility:** People can easily access government services online, reducing the need for physical visits.
- **Faster Communication:** Digital platforms enable quick and efficient communication through emails, messaging apps, and video calls.
- **Boost to Digital Literacy:** Promotes technological skills and knowledge, helping individuals adapt to the digital world.
- **Ease of Payments:** Encourages cashless transactions, making payments faster and more convenient.

DISADVANTAGES OF DIGITAL INDIA

- **Cybersecurity Risks:** Increased digital activity makes users vulnerable to cyberattacks and data breaches.
- **Digital Divide:** Lack of access to technology in rural areas creates inequality in digital literacy.
- **Privacy Concerns:** With more personal data online, there is a higher risk of privacy violations.
- **Dependency on Technology:** Over-reliance on digital platforms can lead to reduced face-to-face interactions and social disconnection.

Impact of Digital India Awareness Program on Juniors:

- **Enhanced Digital Literacy:** The program helped juniors understand digital services, such as e-governance, online transactions, and digital platforms, making them more tech-savvy.
- **Awareness of Cybersecurity:** It educated them on safe online practices, making them aware of cyber threats and the importance of data privacy.
- **Increased Use of Digital Tools:** Juniors were encouraged to adopt digital platforms for learning and daily activities, promoting efficiency and convenience.
- **Improved Technological Confidence:** The session boosted their confidence in using technology, helping them adapt to the digital world more effectively.

THE OUTCOMES OF THE DIGITAL INDIA INITIATIVE ACROSS VARIOUS SECTORS CAN BE SUMMARIZED IN THE FOLLOWING POINTS:

1. **E-Governance and Transparency:** The initiative has improved **government service delivery** by making services available online, ensuring **transparency and reducing corruption**.
2. **Digital Literacy and Inclusion:** It has promoted **digital literacy** by providing access to **technology and the internet**, especially in rural areas, bridging the **digital divide**.
3. **Boost to Digital Economy:** The push for **cashless transactions** and online services has strengthened the **digital economy**, promoting financial inclusion.
4. **Improved Education and Skill Development:** The initiative has enabled **online learning platforms**, digital classrooms, and skill development programs, enhancing **access to quality education**.
5. **Enhanced Connectivity:** Through **BharatNet and Wi-Fi hotspots**, the initiative has improved **internet connectivity** in rural and remote areas.
6. **Cybersecurity and Data Protection:** It has led to **increased awareness and measures** to protect against cyber threats, ensuring **data privacy and security**.
7. **Job Creation and Entrepreneurship:** The growth of **digital startups and e-commerce platforms** has created **new employment opportunities** and boosted entrepreneurship.

ACTIVITY-6

Tourism Promotion Innovative Approaches

INTRODUCTION:

We went on a tourism visit to Hampi, a UNESCO World Heritage Site known for its rich historical and cultural significance. The visit aimed to explore the ancient ruins, temples, and architectural marvels that reflect the grandeur of the Vijayanagara Empire. During the tour, we witnessed magnificent monuments, including the Virupaksha Temple, Vittala Temple, and the Stone Chariot, which showcased the region's artistic and historical heritage.

The trip also provided an opportunity to learn about the history, culture, and lifestyle of the people from that era. By visiting Hampi, we gained a deeper appreciation for India's heritage, while also enjoying the scenic beauty and captivating landscape of the region.

Our visit to Hampi was a journey through history, offering a glimpse into the magnificent architecture and culture of the Vijayanagara Empire. The site's intricately carved temples, massive stone structures, and historic ruins highlighted the rich heritage of ancient India. Walking through Hampi's landscapes, we experienced the grandeur of its past and the significance of its preservation. This trip not only enriched our knowledge but also inspired a deep appreciation for historical monuments

Tourism Visit to Hampi – AICTE Perspective:

The tourism visit to Hampi was organized as part of AICTE's initiative to promote holistic education by encouraging students to explore and understand India's cultural heritage. This initiative aimed to provide experiential learning opportunities, allowing students to gain firsthand knowledge of historical sites and their significance.

The visit emphasized the importance of preserving and appreciating historical monuments, while also fostering a sense of cultural responsibility among students. By experiencing the rich architectural and cultural legacy of Hampi, students were able to enhance their knowledge beyond academic learning, contributing to their overall personal and intellectual growth.

OUTCOME OF ACTIVITY

This Activity Points earned shall be reflected on the student's eighth semester Grade Card. Skill in Socio-Economical Status. Exposure to Society in return good relation with the surrounding world and to the current technological developments relevant to the subject area of training is one other outcome of this activity. Experience gained from the 'Activity Points Programme' will be recorded and used for various relevant purposes. Create conditions conducive to quest for knowledge and its applicability on the job. This Activity also made students to earn knowledge, social responsibility towards society. Thus ensures that technical knowledge is also an integral part of education to develop the standards of society
